Daye Nam

Research Interests

Software Engineering, Human-Computer Interaction, Artificial Intelligence
Machine Learning for SE, Developer Experience, Mining Software Repository

Education

2018–Present **Carnegie Mellon University**, *Pittsburgh*, USA.
Ph.D. in Software Engineering
Advisor: Brad A. Myers, Bogdan Vasilescu, Vincent Hellendoorn

2016–2018 **University of Southern California**, *Los Angeles*, USA.
M.S. in Computer Science
Advisor: Nenad Medvidovic

2012–2016 **Yonsei University**, *Seoul*, Korea.
B.S. in Computer Science

2014-2015 **University of California Irvine**, *Irvine*, USA.
International Exchange Program, Major: Computer Science

Awards & Honors

2019 Finalist for the Microsoft Research Ada Lovelace Fellowship
2019 2nd Place in ASE Student Research Competition, ACM
2019 ACM Student Research Competition Travel Award for ASE 2019, ACM
2018 SIGSOFT CAPS Student Travel Award for ICSE 2018, ACM SIGSOFT
2018 Best Research Award, University of Southern California (2 recipients in CS Department)
2017 Academic Excellence Scholarship, Yonsei Alumni Association of Southern California
2017 Best Tool Paper Award, ASE 2017
2014 – 2015 Academic Excellence Scholarship, Korea Student Aid Foundation
2015 Grand Prize, Graduation Exhibition, Computer Science, Yonsei University
2013 Outstanding Paper Award, WISET
2013 Academic Excellence Scholarship, Yonsei University

Research Experience

09/2018 – Present **Graduate Research Assistant**, *Advisors: Brad Myers, Bogdan Vasilescu, Vincent Hellendoorn*.
Carnegie Mellon University, Pittsburgh, USA
- Designing automatic techniques to extract API-related information from multiple sources (e.g., Stack Overflow), and devising approaches to filter and summarize it.
- Investigated characteristics of boilerplate code, and studied the impact of API design on the need for boilerplate in client code.
- Built MARBLE, a novel approach to automatically mine boilerplate code from a large set of client code.
- Conducted a user study to test the usefulness of providing comparable API methods and confirmed that it helps developers understand the design space of APIs.
- Created SOREL, a machine-learning-based knowledge extraction tool that can automatically identify pairs of comparable API methods and the sentences describing the comparison from Stack Overflow answers.

05/2021 – 09/2021 **Software Engineer Intern**, *Host: Satish Chandra, Collaborator: Baishakhi Ray*.
Probability Team, Facebook, Menlo Park, USA
- Designed compositional neural models to predict a sequence of API functions that would be needed for a task, given an input-output pair.
- Incorporated the compositional models into existing enumerative search-based program synthesizer.

06/2020 – 08/2020 **Research Scientist Intern**, *Host: Andrew Macvean, Co-host: Harini Sampath*.
Cloud DevEx Team, Google, Seattle, USA
- Analyzed documentation pageview logs to understand how different users forage for information in documentation.
- Designed a survey to study developers' documentation preferences and their backgrounds.

05/2017 – 07/2018 **Research Assistant**, *Advisor: Nenad Medvidovic*.
Software Architecture Research Group, University of Southern California, Los Angeles, USA
- Designed and built a tool for visualizing software architecture evolution with contextual information.
- Investigated architectural design decisions in the issue and code repositories, and built a predictive model which identifies the architectural significance.
- Built a benchmark for event-based systems' security vulnerability and evaluated existing vulnerability detection tools.

05/2017 – 04/2018 **Research Assistant**, *Advisor: Mayank Kejriwal*.
Information Sciences Institute, University of Southern California, Los Angeles, USA
- Conducted an empirical study on organizations that expose semantically linked Schema.org annotations.
- Embedded natural language documents as a rich network to improve performance on the multi-class document classification problem.

01/2017 – 03/2017 **Directed Research**, *Advisor: Joseph Lim*.
University of Southern California, Los Angeles, USA
- Designed and implemented the experimental tools for crowdsourcing, and collected video-image-annotation data using Amazon Mechanical Turk.

12/2015 – 07/2016 **Research Assistant**, *Advisor: SeonJoo Kim*.
Computational Intelligence & Photography Lab, Yonsei University, Seoul, Korea
- Conducted research to improve the image digital processing pipeline for smart-phone cameras.
- Performed experiments on deep learning based image filtering with different deep learning models.

01/2013 – 03/2014 **Research Assistant**, *Advisor: InKwon Lee*.
Computer Graphics & Applications Lab, Yonsei University, Seoul, Korea
- Designed and performed experiments on Just-Noticeable Difference (JND) between sound and vision in a 3D environment based on a Head-Related Transfer Function (HTRF) data.

Teaching

Fall 2022 **Co-Instructor**, *17-313 Foundations of Software Engineering*.
Michael Hilton, Rohan Padhye, Chris Timperley, and Daye Nam
- Collaborated with course instructors to enhance course structure, project requirements, and assignments to accommodate a larger class size.
- Delivered 4 lectures on team communication, documentation, ML explainability, and user studies.

Fall 2021 **Head Teaching Assistant**, *17-313 Foundations of Software Engineering*.
Michael Hilton and Rohan Padhye
- Assisted course instructors in developing midterm and assignment content and delivered a lecture on automated developer tools.
- Created grading rubrics for assignments and exams and supervised a team of 3 undergraduate TAs.

Service

Web Chair, *FSE 2023*.

Reviewer, *Semantic Web Journal 2018, FSE 2021 Artifacts, UIST 2022 (external)*.

Committee Member, *CMU ISR-SE Ph.D. Admission, CMU ISR Teaching-Track Faculty Hiring*.

Shadow/Junior PC Member, *MSR 2021, MSR 2023*.

Student Volunteer, *ICSE 2018, ICSE 2020, ICSE 2022*.

CMU Graduate Applicant Support Program at SCS, *Department Lead (2020), Mentor (2020, 2021), SCS Organizer (2022)* .
